Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-52 and 71-78, drawn to a wireless communication system and method wherein the method comprises the steps of providing a downlink channel for transmitting downlink data from a first communication device to a remote communication device and providing an associated channel for the first communication device to receive an uplink response signal from the remote communication device, classified in class 455, subclass 562.1.
 - II. Claims 53-70, drawn to a method of communicating downlink data from a first communication device to a remote communication device comprising steps of: providing a set of sequential time intervals for the first communication device, each of the time intervals having a selected number of downlink channels and the selected number of associated channels on the uplink; transmitting a downlink polling signal from the first communication device on a first downlink channel of a first time interval; and receiving an uplink response signal at the first communication device from the remote communication device in response to the polling signal , classified in class 370, subclass 346.
2. The inventions are distinct, each from the other because of the following reasons:

3. Inventions [I] and [II] are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention [II] has separate utility such as the steps of providing a set of sequential time intervals for the first communication device, each of the time intervals having a selected number of downlink channels and the selected number of associated channels on the uplink; transmitting a downlink polling signal from the first communication device on a first downlink channel of a first time interval. See MPEP § 806.05(d).
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 2682

6. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even through the requirement be traversed.
